... and not so much

Is “Croatian Latin” an useful concept?

How to approach an unknown collection?

Metadata: which language to use?

Subcorpora: how to create, how to replicate?

How to synchronize updates of different implementations  
(PhiloLogic 3 vs. 4 vs. Zenodo...)?

**Easy:** a clean, text-ready environment; for those who just need a text.

**Hard:** lemmatization, morphological annotation, **orthographical variation.**

?? how to use the knowledge from Johann Ramminger's  
Neulateinische Wortliste ([www.neulatein.de](http://www.neulatein.de))?

?? how to deal with the “invisible” aspects of Latin style: rhythm (Collatinus and Pedecerto can help here), word-order, periodic structure?

?? how to open a gateway to the unknown: an anthology connected to the collection?
